PREAMBLE

This is a revised Edition of the listing of information items regarding Alberta Municipalities, that is available from various Provincial Government Departments. As an update of the 1979 edition, this publication includes a number of new information items and some revisions to existing information item particulars.

The "Guide to Information on Municipalities" is published annually by Alberta Municipal Affairs due to requests initiated through the Intergovernmental Conferences on Local Government Information Development. The material contained in this guide will be used to update the annual Statistics Canada publication entitled "Statistical Information on Municipalities Available from Provincial and Territorial Governments".

While every effort has been made to ensure that the listing is as comprehensive as possible, we do not wish to convey the impression that it represents in any way a complete list of information items available. We greatly appreciate comments on any errors, omissions and additions to the guide so that future editions can be as complete as possible.

We wish to acknowledge the co-operation of numerous Alberta Government Departments, Agencies and Crown Corporations who reviewed the information particulars and responded to our request for information.
